Postgraduate Course Corporate Management Systems - SAP

Corporate Management Systems - SAP

The Instituto Politécnico de Tomar (IPT) is part of the worldwide programme

“SAP University Alliances”

SAP University Alliances brings together 3335 education institutions in 111 countries. IPT is participating in this programme in Portugal with the aim of bringing higher education closer to the business reality.

Aims

The Postgraduate Programme in Corporate Management Systems aims to equip graduates with the skills to achieve the following outcomes:

- Acquire a broad understanding of functional areas of organisations and its management;
- Gain a comprehensive and critical understanding of the business processes of an organisation;
- Be able to provide consultancy in the design, development and management of information systems in organisations;

- Be able to use organisational tools and platforms to support organisational processes;
- Have a critical mind for decision-making and for developing innovative programmes and models.

Recipients

Graduates in Business Administration and related areas, Computer Science and Multimedia Technologies, Computer Engineering, Electrical Engineering or other similar degrees. The postgraduate programme is aimed at executives in business and public administration.

Qualification Awarded

- Postgraduate certificate in Enterprise Management Systems with award of a weighted grade point average and ECTS credits;
- Certification upon passing the exam.

Application
